Summary

An experienced and dedicated Business Analyst with a strong track record, eager to apply analytical skills and in-depth knowledge of the product development lifecycle to drive meaningful outcomes. With over 3 years of varied experience, I excel in research, gathering requirements, solution design, and implementation. Driven by a passion for innovation, I bring a forward-thinking approach to enhance products and consistently deliver outstanding results.

EXPERIENCE AS A BUSINESS ANALYST

- Requirement gathering, Requirement elicitation using techniques such as Brainstorming, Interview, Prototype, Workshops & focus group.
- Conducting Gap Analysis, Scope definition using techniques like Use case diagrams (UML), Context Diagram (Data Flow Modelling), BPMN (Business Process modelling Notation).
- Deliver Requirement documents like BRDs, FRDs, SRS, use cases, process flows, change requests, SRS, traceability matrix, and mind maps.
- Domain expertise: Having strong knowledge and experience in Banking, Insurance, Retail, E-commerce and Healthcare.

Experience

Business Analyst

Utkal Accounts & Tax Consulting Pvt. Ltd
09/2021 - Present

- Collaborated with cross-functional teams to gather requirements, define project scope, and develop project plans.
- Translated business needs into user stories, BRDs, FRDs, and SRS documents.
- Conducted gap, scope, and impact analyses using UML, Data Flow Modeling, BPMN, and flowcharts.
- Performed AS-IS and TO-BE analyses, recommending business solutions and designing change strategies.
- Led requirement gathering sessions using interviews, questionnaires, interface analysis, document reviews, brainstorming, and focus group discussions.
- Engaged with stakeholders through interviews and workshops, documenting business needs and presenting findings and recommendations.
- Constructed clear data and process models, creating wireframes and mockups for systems.
- Worked across all SDLC phases, including Waterfall and Agile methodologies.
- Validated requirements through reviews and workshops to ensure alignment with business objectives.
- Performed quality assurance and user acceptance testing to ensure successful and timely "go-live" of applications.
- Assisted in the implementation of new systems, ensuring smooth transitions and high user adoption.
- Acted as the central point of contact for project coordination, liaising with delivery managers.
- Utilized SQL to retrieve necessary data for analysis and reporting.
